

Neil Hines

United States. Congress. Senate. Committee on Energy and Natural Resources

Animals and War Ryan Hediger, 2012-11-01 *Animals and War* is the first collection of essays to study its topic. Using sociology, history, anthropology, and cultural studies, it analyzes a wide range of phenomena and exposes the often paradoxical contours of human-animal relationships.

Journal of the House of Representatives of the United States United States. Congress. House, 1894 Some vols. include supplemental journals of such proceedings of the sessions, as, during the time they were depending, were ordered to be kept secret, and respecting which the injunction of secrecy was afterwards taken off by the order of the House.

Journal of the House of Representatives of the Commonwealth of Massachusetts Massachusetts. General Court. House of Representatives, 1879

Nature Remade Luis A. Campos, Michael R. Dietrich, Tiago Saraiva, Christian C. Young, 2021-07-16 In this fourth volume in our Convening Science series with the Marine Biological Laboratory, contributors, including historians, biologists, and philosophers, explore the development of bioengineering. The essays show how engineering is both a means to a functional end and a method of learning about the world. The book is organized around three themes--controlling and reproducing, knowing and making, and envisioning--to chart the increasing sophistication of our engineering of biological systems and to change our sense of the scales at which engineering occurs, to include not just genetics but also ecosystem-level intervention. The volume will attempt to make the case for the centrality of engineering for understanding and imagining modern life.--
