Hypertension Sunil Nadar,Gregory Y. H. Lip,2015 The management of hypertension varies considerably from clinician to clinician. This resource is a concise and evidence-based summary of current understanding and practice, including the most up-to-date guidance from national bodies and their recommendations for hypertension care. It covers the different phases of investigation and definitive management, and has been fully updated to include new data on the epidemiology of hypertension and new treatment options, as well as a new chapter on renal denervation in hypertension.

Microbial Bioactive Compounds Ravindra Soni,Deep Chandra Suyal,Lourdes Morales-Oyervides,2023-12-29 This book delves into microbial production and its implications for various industries and presents the latest advancements in the field of bioactive compound production by microorganisms. Divided into 16 chapters, the book covers a wide range of topics, starting with the emerging trends in microbial production techniques, followed by the potential of fungi and algae in producing bioactive compounds, and the applications of bioactive compounds in medicine, agriculture, and industry. Contributions from expert scientists emphasize the significance of metabolic engineering and modern analytical techniques for the extraction, purification, and structural characterization of microbial bioactive compounds. The authors also present alternative technologies and methodologies for the recovery and extraction of these compounds from microbial sources and highlight the health-promoting benefits of natural plant-derived bioactive compounds. Particular attention is given to nanocarriers and their potential for managing the delivery of bioactive compounds in therapeutic applications. The importance of actinomycetes and their bioactive potential in the agricultural sector is also discussed. In this book, readers will also find out about the importance of microbial community dynamics in Antarctica, their ecological potential, and their industrial application. The last chapter of the book offers an industrial perspective of microbial pigments and their applications. This book is a valuable resource for researchers, academics, and industry professionals seeking to understand and harness the potential of microbial bioactive compounds for sustainable development, industrial applications, and improved human well-being.

Ergonomics for Improved Productivity Mohammad Muzammil,Abid Ali Khan,Faisal Hasan,2021-03-23 p= This highly

informative and carefully presented book focuses on the fields of ergonomics/human factors and discusses the future of the community vis-à-vis health problems, productivity, aging, etc. Ergonomic intercession must be seen in light of its effect on productivity because ergonomic solutions will improve productivity as the reduction of environmental stressors, awkward postures and efforts lead to a reduction in task execution time. The book provides promising evidence that the field of ergonomics continues to thrive and develop deeper insights into how work environments, products and systems can be developed to meet needs, demands and limitations of humans and how they can support productivity improvements. Some of the themes covered are anthropometry and workplace design, biomechanics and modelling in ergonomics, cognitive and environmental ergonomics, ergonomic intervention and productivity, ergonomics in transport, mining, agriculture and forestry, health systems, work physiology and sports ergonomics, etc. This book is beneficial to academicians, policymakers and the industry alike. ^

Proceeding of International Conference on Intelligent Communication, Control and Devices Rajesh Singh,Sushabhan Choudhury,2016-09-17 The book presents high-quality research papers presented at the first international conference, ICICCD 2016, organised by the Department of Electronics, Instrumentation and Control Engineering of University of Petroleum and Energy Studies, Dehradun on 2nd and 3rd April, 2016. The book is broadly divided into three sections: Intelligent Communication, Intelligent Control and Intelligent Devices. The areas covered under these sections are wireless communication and radio technologies, optical communication, communication hardware evolution, machine-to-machine communication networks, routing techniques, network analytics, network applications and services, satellite and space communications, technologies for e-communication, wireless Ad-Hoc and sensor networks, communications and information security, signal processing for communications, communication software, microwave informatics, robotics and automation, optimization techniques and algorithms, intelligent transport, mechatronics system, guidance and navigation, algorithms, linear/non-linear control, home automation, sensors, smart cities, control systems, high performance computing, cognition control, adaptive control, distributed control, prediction models, hybrid control system, control applications, power system, manufacturing, agriculture cyber physical system, network control system, genetic control based, wearable devices, nano devices, MEMS, bio-inspired computing, embedded and real-time software, VLSI and embedded systems, FPGA, digital system and logic design, image and video processing, machine vision, medical imaging, and reconfigurable computing systems.

Medical Image Computing and Computer-Assisted Intervention - MICCAI 2003 Randy E. Ellis,Terry M. Peters,2003-11-11 The 6th International Conference on Medical Imaging and Computer-Assisted Intervention,MICCAI2003,washeldinMontr ́eal,Qu ́ebec,CanadaattheF- rmont Queen Elizabeth Hotel during November 15–18, 2003. This was the ?rst time the conference had been held in Canada. The proposal to host MICCAI 2003 originated from discussions within the Ontario

Consortium for Ima- guided Therapy and Surgery, a multi-institutional research consortium that was supported by the Government of Ontario through the Ontario Ministry of E- erprise, Opportunity and Innovation. The objective of the conference was to o?er clinicians and scientists a - rum within which to exchange ideas in this exciting and rapidly growing ?eld. MICCAI 2003 encompassed the state of the art in computer-assisted interv- tions, medical robotics, and medical-image processing, attracting experts from numerous multidisciplinary professions that included clinicians and surgeons, computer scientists, medical physicists, and mechanical, electrical and biome- cal engineers. The quality and quantity of submitted papers were most impressive. For MICCAI 2003 we received a record 499 full submissions and 100 short c- munications. All full submissions, of 8 pages each, were reviewed by up to 5 reviewers, and the 2-page contributions were assessed by a small subcomm- tee of the Scienti?c Review Committee. All reviews were then considered by the MICCAI 2003 Program Committee, resulting in the acceptance of 206 full papers and 25 short communications. The normal mode of presentation at MICCAI 2003 was as a poster; in addition, 49 papers were chosen for oral presentation.

Information and Communication Technology for Competitive Strategies (ICTCS 2020) M. Shamim Kaiser,Juanying Xie,Vijay Singh Rathore,2021-07-05 This book contains the best selected research papers presented at ICTCS 2020: Fifth International Conference on Information and Communication Technology for Competitive Strategies. The conference was held at Jaipur, Rajasthan, India during 11–12 December 2020. The book covers state-of-the-art as well as emerging topics pertaining to ICT and effective strategies for its implementation for engineering and managerial applications. This book contains papers mainly focused on ICT for computation, algorithms and data analytics and IT security.

Ambient Communications and Computer Systems Gregorio Martinez Perez,Shailesh Tiwari,Munesh C. Trivedi,Krishn K. Mishra,2018-03-20 This book includes high-quality, peer-reviewed papers from the International Conference on Recent Advancement in Computer, Communication and Computational Sciences (RACCCS-2017), held at Aryabhatta College of Engineering & Research Center, Ajmer, India on September 2–3, 2017, presenting the latest developments and technical solutions in computational sciences. Data science, data- and knowledge engineering require networking and communication as a backbone and have a wide scope of implementation in engineering sciences. Keeping this ideology in mind, the book offers insights that reflect the advances in these fields from upcoming researchers and leading academicians across the globe. Covering a variety of topics, such as intelligent hardware and software design, advanced communications, intelligent computing technologies, advanced software engineering, the web and informatics, and intelligent image processing, it helps those in the computer industry and academia use the advances of next-generation communication and computational technology to shape real-world applications.

India Versus China Kanti P. Bajpai,2021

Between Water and Fire Vinod Vincent Rajesh,2018-01-16 Consciousness about self-identity and history is an offshoot of

colonial rule. Governments in independent India that largely inherited the economic and political structure of the colonial rule fueled this consciousness by adopting the policy of caste-based reservation in matters of public utility and services. Manifestoes issued by political parties during elections guarantee relocation of castes. Thus, communities segmented as castes are in constant flux and often claim higher social status while providing data for lower economic status. The Parathavar community that was deeply exposed to colonial rule by the Portuguese, Dutch and English by virtue of being inhabitants of the Pearl Fishery Coast was no exception to this trend. This book, though presented as a collection of articles, looks into the social, economic and religious past of the Parathavar community prior to their embracing Christianity and seeks to compare that with the developments after conversion. These articles are attempts to collect historical information from the memory of noted writer and Sahitya Academy winner R. N. Joe d'Cruz and compare it with the information gleaned from archives, field visits and presentations situated within the historical context. Hence, this scholarly work is purely apolitical and academic. But, it provides critical input for understanding the consciousness of the Parathavar people and others in the present.

Futuristic Communication and Network Technologies N. Subhashini,Morris. A. G. Ezra,Shien-Kuei Liaw,2023-06-22 This book presents select proceedings of the Virtual International Conference on Futuristic Communication and Network Technologies (VICFCNT 2021). It covers various domains in communication engineering and networking technologies. This volume comprises recent research in areas like cyber-physical systems, acoustics, speech & video signal Processing, and the Internet of Things. This book is a collated work of academicians, researchers, and industry personnel from the international arena. This book will be useful for researchers, professionals, and engineers working in the core areas of electronics and communication.

Focus on Bacterial Biofilms Theerthankar Das,2022-11-02 Bacterial biofilms are colonies of bacterial cells embedded in their self-produced matrix composed of polysaccharides, DNA, and proteins. They protect bacterial cells against antibiotics, antibacterial agents, soaps and detergents, and shear stress. Some of the most common biofilm-associated infections in humans include urinary tract infections, infection of wounds and surgical sites, diabetic foot ulcers, dental caries (tooth decay) and gingivitis (gum inflammation), ventilator-associated infections, sinusitis, microbial keratitis, secondary infection related to Covid-19 and other viral infections, and so on. Bacterial resistance to common antibiotics (e.g., penicillin, gentamycin, erythromycin, ciprofloxacin, etc.) is driving us to a catastrophic failure of our health systems. Strategies to develop novel antibacterial agents and technology must be prioritized to combat and eradicate biofilms and their associated challenges. This book provides a comprehensive overview of biofilms with chapters on bacterial virulence factors, quorum sensing in bacteria, antimicrobial resistance in bacteria, strategies to develop new antibacterial agents, and much more.

The Forgotten Dynasty Behind the Biggest Hoards of India Dr Immanuel Muthunayagom,2014-09-04 The rulers of

Chera, Chola and Pandya Kingdoms of South India were from the same family roots, and were brothers. They had a very great tradition from 10000 to 30000 of years. They were Chandors. They built their capital even in 2220 BC in Goa. Their language was Tamil. The first historian of the world, Herodotus points out that those people were known as the Panis who were later known to the world as the Palm-Asians, and still later as the Phoenicians. Those Panis (Panayan) were great merchant guilds sailing the seas to Greek, Ionia, Egypt, etc. They parted the art of writing to the foreign countries. Some Pharos of Egypt are known to be of these people. They had relations with the Hittites, Chaldeans etc. They were great warriors and sailors. Toddy taping was one of their professions in addition to hunting and trade. These ancient people were connected with Palmyra Palm and also with the Boddhi tree (tree of knowledge) of Saint Sri Buddha. Their identity and history is almost lost except in some Copper-plates, Inscriptions and the old Tamil literature. The Persian, Arabian and Western invasions to India have almost erased the history of these people. The last king of their tradition was abducted from his ancestral Palace in 1810 AD and was killed. The ancestral Palace gone to his descendants could not be claimed by his relatives in the newly developed political circumstances. History been marred and camouflaged. In the year 2011, a very huge Hoard of treasures were detected in a temple at Trivandrum. It contained many Crowns of the early kings of this dynasty. But, the mother Palace, Eraniyel, and the people behind it were sidelined by new social groups. This book, in addition to tracing out the original dynasty, its root and history, tries to feed new life to a neglected and 'Forgotten Dynasty' and people who were once the apostles of Culture and civilization in the world. The author supplies evidences from literature, traditions, a number of Copper plates, inscriptional and documental evidences to prove his arguments extending to several centuries ahead of this present age.
